

iveri DiVert

GET PAID REMOTELY

Turn any payment request into a simple digital payment journey.

Create a secure payment request and send it however suits the merchant — no website required.

WHY CHOOSE DIVERT ?

SIMPLE. SECURE. FLEXIBLE PAYMENTS

NO WEBSITE NEEDED

Works independently of an online store.

SEND IT YOUR WAY

Share the payment link via SMS, email, WhatsApp or any channel.

SECURE BY DESIGN

Payments happen on iVeri's hosted page, not over the phone or in a message.

ONE-OFF OR RECURRING

Ideal for single deposits or a recurring invoice pattern.

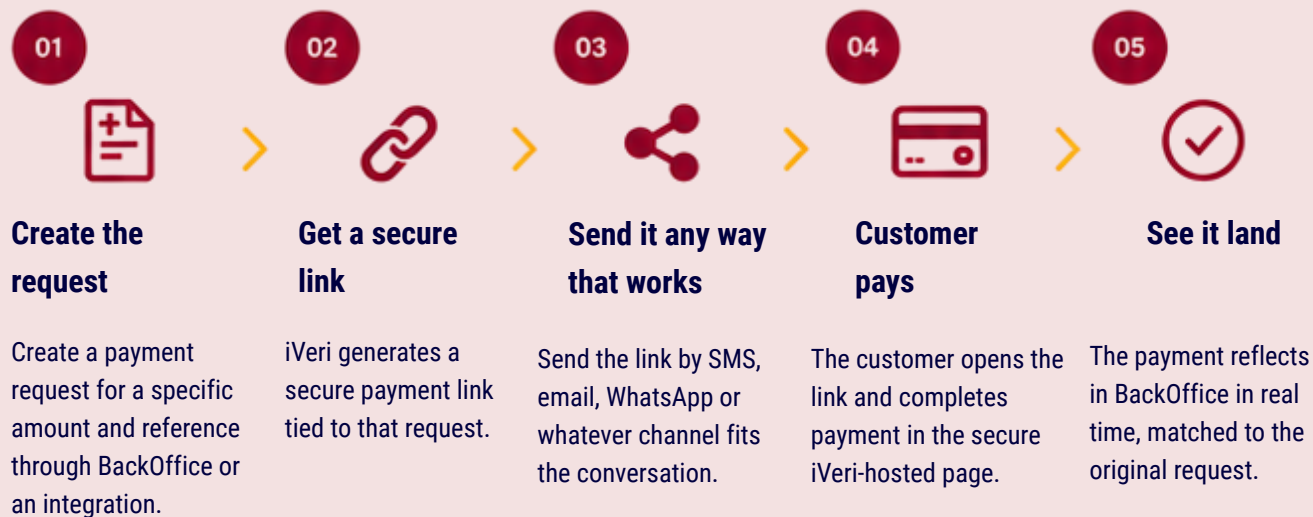

TRACK & MANAGE

Payments reflect in BackOffice in real time, matched to the original request.

HOW DIVERT WORKS

A SIMPLE PROCESS FROM REQUEST TO PAYMENT.

PERFECT FOR MERCHANTS WHO:

-  Hospitality deposits
-  Call centres
-  Professional services
-  Invoicing
-  No e-commerce site

THE MERCHANT PROBLEM

THE CUSTOMER ISN'T IN FRONT OF THEM.

The merchant needs to collect payment from someone who isn't physically present and doesn't have — or want to rely on a full e-commerce site: a phone booking, a deposit, an invoice.

INTEGRATION & TECHNICAL LEVEL

FLEXIBLE OPTIONS TO SUIT YOUR MERCHANT

Low - Medium integration effort.
No integration is required for basic use through backoffice. An API is available for merchants who want payment requests generated automatically from their own system.
