THE MERCHANT PROBLEM

Off-the-shelf checkout isn't enough.

The merchant needs payments to work exactly the way their platform, app or website requires – and they have the technical resources to build and maintain the integration.

SALES CONVERSATION

Ask your merchant: "Do you have developers and need people to develop directly into your own website, app or platform?"
If yes – talk to them about iVeri Enterprise.

INTEGRATION LEVEL

Requires development resources to build and maintain the integration. Enterprise offers significantly more flexibility and control in return.
