

BUILT-IN PAYMENTS FOR THE SABRE BOOKING ENGINE

Ready-made payment acceptance inside the SynXis booking flow.

iVeri's integration with Sabre SynXis enables payment acceptance through onboarding and setup alone – no technical integration required on the hotel's side.

Seamless bookings. Secure payments. Happier guests.

KEY BENEFITS

NO TECHNICAL INTEGRATION

Onboarding and setup only- no development required on the hotel's side

FAST TO ENABLE

Ideal for hotels already using Sabre SynXis

SECURE BY DESIGN

Payment information moves securely from SynXis to the iVeri Gateway

OPTIONAL 3D SECURE

Adds authentication for extra protection on both sides of the transaction

CENTRALISED REPORTING

BackOffice gives one place to search, reconcile and report across properties

HOW SYNXIS WORKS

LIVE THROUGH ONBOARDING, NOT CODE.

1

Guest confirms the reservation

The guest reviews and confirms their booking details on the SynXis booking engine.

2

Guest pays on SynXis

The guest enters their card details directly on the SynXis booking engine.

3

Details reach iVeri securely

Payment information is transmitted securely to the iVeri Gateway via the SynXis-Veri integration.

4

iVeri processes and responds

iVeri processes the payment and sends the outcome back to SynXis.

5

Guest and hotel both see the result

The guest sees confirmation immediately, and the hotel's records update in BackOffice.

PERFECT FOR

Hotels on Sabre SynXis

Hotel groups wanting fast go-live

Multi-purpose operators

Properties without a dev team

THE MERCHANT PROBLEM

Guests need to pay at booking, without a build.

A merchant using the SynXis booking engine needs guests to pay securely when they reserve, but doesn't have the developers – or the appetite to fund and maintain their own payment integration.

INTEGRATION LEVEL

LOW

Onboarding and configuration only. No integration work is required from the hotel's own team.

FOUND A SYNXIS OPPORTUNITY?

Any hotel already booking through Sabre SynXis is a fast, low-effort payments conversation.
